SUMMARY

Full Stack Engineer with 3+ years of experience building production backend systems and web applications. Worked at Cognizant Technology Solutions on enterprise-scale Java Spring Boot APIs and AWS deployments. Continued Java development through independent projects post-Cognizant, including a live full-stack app with a Spring Boot backend. Currently delivering marketplace and AI-integrated backend systems at Growth Loops Technology using NestJS and Next.js. Strong in REST API design, database modelling, and system architecture — actively targeting Java/Spring Boot roles.

SKILLS

Primary Stack: Java, Spring Boot, REST APIs, Microservices Architecture, React, MySQL

Current Stack: NestJS, TypeScript, Next.js, Prisma ORM, PostgreSQL, WebSockets

Cloud & DevOps: AWS S3, AWS EC2, CI/CD Pipelines, GitHub Actions, GitLab, Docker (basics)

Other: System Design, API Architecture, JWT Auth, Query Optimisation, Agile / JIRA

EXPERIENCE

Backend Engineer · Growth Loops Technology · Sep 2025 – Present Remote, India

- Built scalable REST APIs and backend services using NestJS, TypeScript, and Prisma ORM powering core product modules.
- Designed and implemented a real-time WebSocket chat system for an AI-integrated chatbot product.
- Delivered full marketplace backend — product catalog, vendor onboarding, and end-to-end order management flows.
- Integrated AWS S3 with secure presigned URL pipelines for production media upload and retrieval.
- Managed PostgreSQL schema design and Prisma migrations across production environments.
- Improved API performance through query optimisation and modular service architecture.

Full Stack Engineer · Cognizant Technology Solutions · Dec 2021 – Apr 2024 Kolkata, India

- **Java & Spring Boot:** Built and maintained 10+ production REST APIs using
- Handled AWS EC2 deployments and CI/CD pipeline setup for production and staging environments.
- Developed responsive, performant UI components using ReactJS, TypeScript, and MUI — improved rendering performance via memoisation and lazy loading.
- Collaborated in cross-functional Agile teams; participated in code reviews and resolved production-critical issues.
- Worked with MySQL for schema design, query optimisation, and data migrations across enterprise-scale tables.

PROJECTS

Code Tracker — Java, Spring Boot, TypeScript, React [Live](#) · [Code](#)

- Full-stack coding activity tracker with a Java Spring Boot backend and React/TypeScript frontend — separate backend and frontend services, live deployed. (2024–2025, 51+ commits)

Job Portal — React, Spring Boot, MySQL, JWT, MUI [Live](#) · [Code](#)

- Production-grade job portal with User, Recruiter, and Admin roles — JWT auth, role-based access control, recruiter workflows, and admin dashboards. (2024)

Hotel Management System — *Java, Spring Boot, React, MySQL, AWS EC2*

- Full-stack hotel management system with booking, guest management, service requests, and billing modules deployed on AWS. (2024)

Movie App — *ReactJS, MUI, TMDb REST API* [Live](#) · [Code](#)

- React app integrating TMDb API with search, pagination, and dynamic routing. (2023)

E D U C A T I O N

B.Tech — Computer Science & Engineering University Institute of Technology, Burdwan · 2017 – 2021

T R A I N I N G

AccioJob – Full Stack Java + Spring Boot Program · 2024 – 2025

Intensive program covering Java, Spring Boot, microservices architecture, system design, DSA, and full-stack development — undertaken during career transition to deepen Java expertise.
